**Connect your interactive
kiosk to the Internet**

Wired

1 - Plug a Rj45 Ethernet cable into your kiosk

2 - Plug the cable into your router (local network)

Wait a few seconds ...

Your kiosk is connected to the Internet

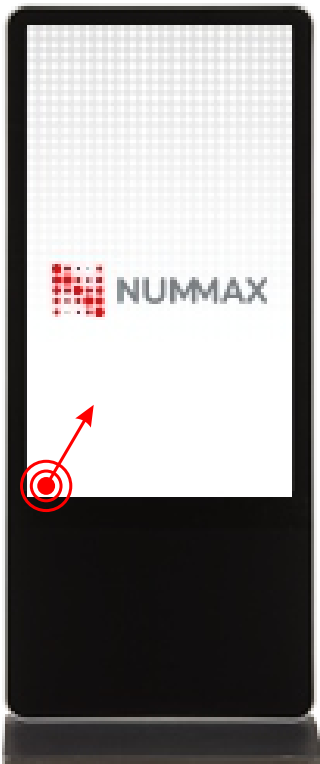

Wireless

1 - Access to the kiosk Windows OS

Method 1

Touch and slide quickly your finger from bottom left corner.
It will display Windows' taskbar.

Method 2

Plug a keyboard into your kiosk.
(USB on the back)

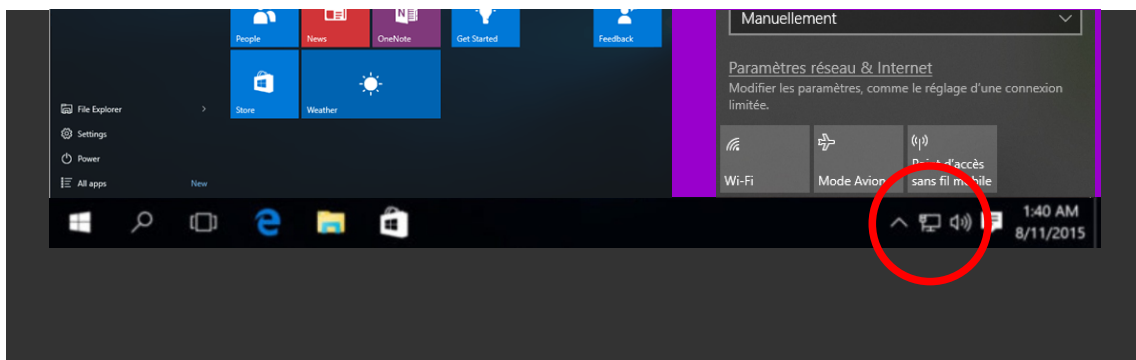

Click on the Windows key to display Windows' taskbar.

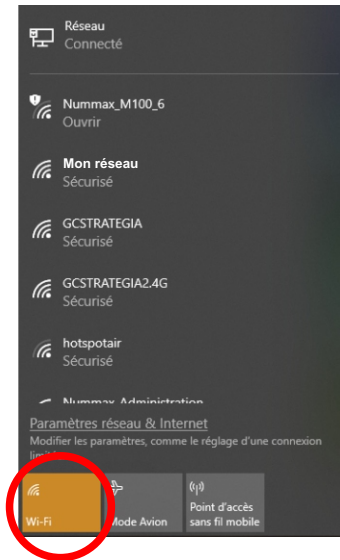

2 - Access to network settings

On the touchscreen, click on the connexion icon in the taskbar.

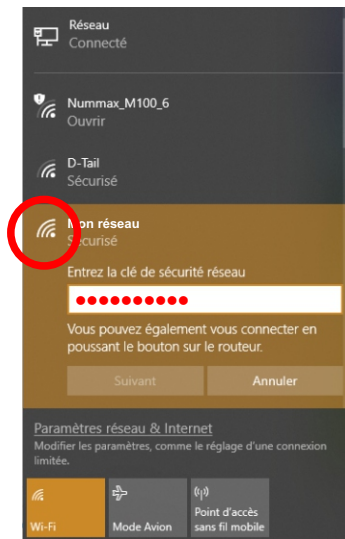

3 - Select your network

If needed, activate the kiosk wifi.

Click on your network and input your password.

Wait a few seconds ...

Your kiosk is connected to the Internet
