

- 1 Bring your computer close to the LED Poster.
On your computer, search for the Wifi networks available.

- 2 Check the Poster network name and password on the top sticker.
Select the Poster network and input the password.

- 3 Open your Internet browser and input the following IP address: **192.168.43.1**
You will access your poster local software. You can start to create content, publish and control your Poster.
